Re: Infrastructure Engineer

Dear Hiring Manager

For Purpose Aged Care's Infrastructure Engineer opportunity combines the Microsoft cloud, endpoint and operational responsibilities that have defined my career. I'm motivated by roles where reliable technology directly supports staff and the people they serve.

At Capgemini, I supported a 660,000+ user Department of Education Victoria environment as a Tier-3 authority across Microsoft 365, Entra ID, SharePoint, Exchange and hybrid identity. At Australia Post and St John of God Health Care, I delivered endpoint imaging, Autopilot, Intune, Windows 11 migration, hardware support and lifecycle management.

I can contribute across infrastructure support, cloud administration, identity, endpoint operations, incident management and automation. My approach is practical and service-focused: resolve the fault, understand the cause, communicate clearly and leave behind a maintainable solution.

Yours sincerely

Sam Ludwig
