Re: Lead EUC Engineer

Dear Hiring Manager

VicRoads' Lead EUC Engineer role matches my experience designing and operating reliable Windows endpoint services. I bring recent migration and lifecycle delivery, together with broader Microsoft 365, identity and automation depth from enterprise managed services.

At St John of God Health Care, I led Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, SOE controls, compatibility testing and hypercare. At Australia Post, I managed endpoint diagnostics, imaging, provisioning, Autopilot/UEM enrolment, inventory and compliant disposal in a high-volume environment.

My Capgemini experience adds the engineering maturity needed for a lead role: Tier-3 escalation, PowerShell and Graph automation, RCA, change control and documentation across a 660,000+ user environment. I can help VicRoads improve endpoint reliability while keeping delivery practical for support teams and staff.

Yours sincerely

Sam Ludwig
