## **Re: Infrastructure, Azure & Security Engineer**

Dear Hiring Manager

Westbourne Grammar School's Infrastructure, Azure and Security Engineer role matches the intersection of my cloud, identity, endpoint and security experience. I can support a modern Azure environment while keeping day-to-day systems reliable, documented and usable for staff.

At Capgemini, I supported the Department of Education Victoria as a Tier-3 authority across Microsoft 365, Entra ID, hybrid identity, SharePoint, Exchange and Teams. I managed a 660,000+ user SharePoint environment with 99.9% uptime and built PowerShell, PnP PowerShell and Graph automation for provisioning and compliance auditing.

My endpoint work at Australia Post and St John of God Health Care adds practical Intune, Autopilot, Windows 11, lifecycle and support experience. I also supported Azure cloud initiatives aligned with Essential 8 requirements, so I understand that security controls must be implemented in a way that operations can sustain.

Yours sincerely

Sam Ludwig
