

Sam Ludwig

Infrastructure | Cloud | Modern Workplace

Melbourne, VIC, 0405 993 245, sam.ludwig@gmail.com, samludwig.au, github.com/Ludwixix

Professional Summary

Field-based infrastructure professional seeking practical outdoor, parks, facilities or council-contracted work. Brings site assessment, physical equipment handling, systematic fault-finding, customer communication, inventory discipline and experience working across Melbourne locations. Any role-specific horticulture, conservation or trade requirements can be discussed directly.

Profile

The Port Melbourne depot and City of Port Phillip work area make this the strongest local outdoor option. My field-service background includes multi-site work, equipment handling, systematic troubleshooting and early-start service schedules.

Skills

Customer support, Field service, Site assessment, Equipment handling, Structured work procedures, Fault-finding, Asset and inventory control, Customer and stakeholder communication, Safety-conscious work practices, Fibre/copper infrastructure, HVAC service, and Documentation

Professional Experience

L2/L3 Technical Support Engineer - Australia Post via Capgemini

February 2026-June 2026, Melbourne, Victoria

- Managed equipment, inventory, loan devices, accessories, provisioning, repair, and compliant disposal in a high-volume service operation.
- Worked through complex faults, followed documented procedures, and coordinated escalations with engineering teams.

Endpoint Migration Engineer - St John of God Health Care

October 2025-January 2026, Melbourne, Victoria

- Prepared and deployed more than 100 endpoints in live clinical environments, with structured checks, handover, and hypercare.
- Worked with staff and technical teams to resolve equipment and application issues without disrupting clinical operations.

Senior Managed Services Engineer - Capgemini

December 2021-2023, Melbourne, Victoria

- Maintained disciplined asset, incident, documentation, and escalation practices across enterprise infrastructure services.
- Used automation and root-cause analysis to reduce repeat work and improve service operations.

HVAC Service Technician - PolaAir

2017, Melbourne, Victoria

- Installed, maintained, and repaired commercial HVAC systems across multiple sites.
- Managed service schedules, equipment, systematic fault-finding, and customer communication in field conditions.

Telecommunications Technician - NBN Co

October 2016-November 2017, Melbourne, Victoria

- Worked across Melbourne sites installing fibre and copper infrastructure, equipment, NTDs, routers, and customer-premises equipment.
- Completed site assessments, cable routing, physical fault-finding, equipment handling, and customer communication.
