Re: Level 2 Desktop Support - Metro Trains Melbourne

Dear Hiring Manager

I am applying for the Level 2 Desktop Support position with Metro Trains Melbourne. This role fits my hands-on desktop support and escalation background, including Windows endpoint troubleshooting, hardware lifecycle work, structured incident ownership, and calm customer communication in service-critical environments.

At Australia Post via Capgemini, I delivered endpoint and infrastructure support, managed hardware and software lifecycle work, resolved complex faults, and built ServiceNow automation that reduced repetitive manual effort. At St John of God Health Care, I delivered a Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, application validation, and post-deployment support.

Earlier work with Capgemini for the Department of Education Victoria involved Microsoft 365, Entra ID, hybrid identity, Azure, security-aware change, Tier 3 escalation, PowerShell automation, and documented operational improvement at significant scale. My field background adds practical fault-finding, equipment handling, site assessment, and reliable work ownership.

The areas most relevant to this role are level 2 support, desktop support, windows, hardware diagnostics. I would bring dependable task ownership, clear communication, and a willingness to learn the way your team works.

I am happy to confirm any licence, qualification, clearance, roster, travel, or role-specific requirement before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
