Re: Workplace Technology Analyst - Yarra Valley Water

Dear Hiring Manager

I am applying for the Workplace Technology Analyst position with Yarra Valley Water. This workplace technology role aligns with my experience improving the endpoint and Microsoft 365 experience through practical support, migration, policy validation, automation, user communication, and durable documentation.

At Australia Post via Capgemini, I delivered endpoint and infrastructure support, managed hardware and software lifecycle work, resolved complex faults, and built ServiceNow automation that reduced repetitive manual effort. At St John of God Health Care, I delivered a Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, application validation, and post-deployment support.

Earlier work with Capgemini for the Department of Education Victoria involved Microsoft 365, Entra ID, hybrid identity, Azure, security-aware change, Tier 3 escalation, PowerShell automation, and documented operational improvement at significant scale. My field background adds practical fault-finding, equipment handling, site assessment, and reliable work ownership.

The areas most relevant to this role are workplace technology, Microsoft 365, Intune, windows. I would bring dependable task ownership, clear communication, and a willingness to learn the way your team works.

I am happy to confirm any licence, qualification, clearance, roster, travel, or role-specific requirement before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
