PROFESSIONAL SUMMARY

M365 Engineer and Infrastructure Specialist with 7+ years delivering enterprise IT services at scale across government, logistics, healthcare, and technology sectors. Most recently at Capgemini, managed the largest SharePoint farm in the Southern Hemisphere (660K+ users) with 99.9% uptime while automating identity management, endpoint lifecycle, and compliance frameworks. Hands-on experience across Entra ID, Intune, Autopilot, PowerShell automation, and hybrid AD environments. Certified Azure Administrator seeking to apply deep M365 and endpoint expertise in a role with true operational ownership.

EXPERIENCE

Senior Managed Services Engineer | Capgemini (Melbourne) | December 2021 – May 2026

Managed the Department of Education Victoria's enterprise M365 environment — the largest SharePoint deployment in the Southern Hemisphere — as the Tier-3 escalation point for complex M365, SharePoint, and identity issues.

- **SharePoint & M365 Administration:** Managed a 660,000+ user SharePoint Online farm spanning thousands of enterprise sites, maintaining 99.9% uptime while handling site provisioning, permissions management, and content governance across the portfolio.
- **Identity & Directory Management:** Administered hybrid AD/Entra ID environment including user synchronization, AD Connect configuration, and identity conflict resolution between Active Directory, Entra ID, and Google Workspace.
- **Security & Compliance Automation:** Built a PnP PowerShell MFA compliance auditing framework covering 200+ SharePoint Online sites, enabling security teams to monitor authentication posture across the entire environment in real time.
- **PowerShell Automation:** Developed comprehensive automation toolkit for M365 administration tasks — user provisioning, configuration templating, tenant management — reducing manual processing time by up to 87% across routine operations.
- **ServiceNow Integration:** Engineered integration connecting M365 presence data with ServiceNow ITSM, enabling algorithmic ticket routing based on real-time engineer availability and skill matching for enhanced service delivery.
- **Azure Cloud Adoption:** Led Azure cloud initiatives aligned with Essential 8 cybersecurity compliance, managing cloud resource provisioning and security baseline configuration.
- **Incident Management & Documentation:** Authored RCA reports and knowledge base articles achieving a 15% reduction in repeat incidents, standardising remediation procedures across the M365 practice.

L2/L3 Technical Support Engineer | Australia Post (via Capgemini) | 2023 – 2024

Provided technical support for Australia Post's enterprise environment, focusing on device management, endpoint lifecycle, and automation within a large logistics environment.

- **Endpoint Lifecycle Management:** Managed device repair, OS re-imaging, and provisioning for enterprise endpoints, ensuring operational continuity across depots and offices.
- **Windows Autopilot & Intune:** Configured and deployed Windows laptops using Microsoft Autopilot and Intune, managing device enrolment profiles, compliance policies, and application deployment.
- **Automation Development:** Developed keystroke injection automation for ServiceNow ticket management, reducing manual data entry overhead for recurring support workflows.
- **Self-Service Solutions:** Deployed self-help kiosk solutions that reduced support ticket volume by enabling users to resolve common issues independently.

Endpoint Migration Engineer | St John of God Health Care (Melbourne) | 2023

Led Windows 11 migration across 100+ clinical endpoints in a healthcare environment, ensuring EMR compatibility and minimal disruption to clinical operations.

- **Windows 11 Migration:** Planned and executed migration of 100+ clinical endpoints to Windows 11, managing compatibility testing, deployment scheduling, and post-migration validation.
- **Intune & Autopilot Configuration:** Configured Microsoft Autopilot deployment profiles and Intune compliance policies for healthcare devices, ensuring security baselines aligned with clinical requirements.
- **Clinical Liaison:** Worked directly with clinical end-users to validate EMR compatibility and minimise operational disruption throughout the migration lifecycle.

Application Support Engineer | Knosys (Melbourne) | December 2020 – December 2021

Provided Level 3 support and automation development for GreenOrbit intranet platform serving major Australian enterprises including Cotton On, Harvey Norman, and Healthscope.

- **L3 Platform Support:** Managed escalated support for enterprise intranet platforms, handling complex configuration issues, performance troubleshooting, and client-facing incident management.
- **PowerShell Automation:** Developed PowerShell automation reducing manual processing overhead by up to 87% across recurring administrative tasks and platform maintenance.
- **Scripting & Tooling:** Created Python and PowerShell patching scripts reducing ongoing maintenance effort by 20%, with automated execution via Azure DevOps pipelines.
- **Client Management:** Maintained relationships with enterprise clients, managing expectations and escalating critical issues through to resolution.

SharePoint Developer | Engage Squared (Melbourne) | March 2018 – December 2020

Developed enterprise SharePoint intranets and collaboration solutions for major Australian organizations including Victoria Police, Transurban, and Cimic Group.

- **Enterprise SharePoint Delivery:** Delivered 5+ enterprise SharePoint intranet solutions for government and corporate clients, managing full lifecycle from requirements gathering through deployment and handover.
- **SPFx Development:** Built custom SharePoint Framework web parts using React and TypeScript, delivering tailored user experiences and business-specific functionality.
- **DevOps & CI/CD:** Implemented Azure DevOps CI/CD pipelines for SharePoint solution deployments, enabling automated build, test, and release workflows.
- **Adoption & Training:** Conducted client workshops driving 20% increase in M365 adoption across delivered solutions, developing training materials and user guides.

Telecommunications Technician | NBN Co (Melbourne) | October 2016 – November 2017

Installed and maintained NBN Layer 1 infrastructure across residential and business premises.

CERTIFICATIONS

Certification	Year
Microsoft Certified: Azure Administrator Associate (AZ-104)	2024
Microsoft Certified: Azure Fundamentals (AZ-900)	2023
ITIL 4 Foundation	2022
Certified Scrum Master (CSM)	2021

TECHNICAL SKILLS

Domain	Technologies
Identity & Access	Active Directory, Entra ID (Azure AD), AD Connect, MFA, Identity Governance
M365 Administration	SharePoint Online, Exchange Hybrid, Microsoft Teams, OneDrive, Power Platform, M365 Groups
Endpoint Management	Microsoft Intune, Windows Autopilot, Windows 10/11, Patch Management, Device Compliance
Automation & Scripting	PowerShell (PnP, Graph API, Exchange Online), Python, Azure Automation, Azure DevOps CI/CD
Security & Compliance	Essential 8, MFA, Conditional Access, DLP, Security Baselines
ITSM & Tools	ServiceNow, Jira, Confluence, RCA, Incident Management, Knowledge Management
Cloud & Infrastructure	Azure Cloud Services, Azure Virtual Networking, VPN, DHCP/DNS, ServiceNow ITSM Integration

EDUCATION

Diploma of Information Technology — Coder Academy (Bootcamp), Melbourne (2018)

Full working rights | Melbourne-based, remote/hybrid flexible | Available immediately
