13 June 2026

Dear Hiring Manager at Amazon Web Services (AWS),

I am writing to express my interest in the Engineering Operations Technician role at Amazon Web Services (AWS). My career spans both physical infrastructure and large-scale IT operations, giving me a well-rounded technical foundation that is well-suited to data center environments.

I began my career as a Telecommunications Technician at NBN, deploying Layer 1 infrastructure, running physical cabling, and performing fault finding across residential and commercial environments. I then moved into endpoint engineering roles where I managed hardware provisioning, OS reimaging, and device lifecycle at scale. Most recently, I served as the Tier-3 escalation point for the Department of Education Victoria, managing the largest SharePoint farm in the Southern Hemisphere.

I am comfortable working with physical hardware, following strict processes, and maintaining critical infrastructure. I hold ITIL 4 Foundation certification and am experienced with incident management, RCA documentation, and SLA adherence.

I am immediately available and would welcome the opportunity to contribute to Amazon Web Services (AWS)'s data center team.

Kind regards,

Sam Ludwig
