13 June 2026

Dear Hiring Manager at Ecolab,

I am writing to apply for the Field Service Technician position at Ecolab. I am a hands-on technical professional looking to move into a field-based role where I can apply my troubleshooting skills and physical technical experience.

My background includes field cabling and infrastructure deployment at NBN, hardware provisioning and OS reimaging for Australia Post, and enterprise endpoint migrations across 100+ clinical sites at St John of God Health Care. I am comfortable working on-site, managing my own schedule, and providing excellent customer-facing technical support.

I build tools to make my work more efficient - I engineered PowerShell automation that reduced migration processing by 87%, a keystroke injection system for automated ITSM workflows, and a Python diagnostic tool enabling L1 staff to run Exchange/Teams diagnostics independently.

I am immediately available and would love to discuss how my technical adaptability and hands-on experience align with the needs of Ecolab's field service team.

Kind regards,

Sam Ludwig
