13 June 2026

Dear Hiring Manager at Mastercard,

I am writing to apply for the Senior Site Reliability Engineer position at Mastercard. My career has been defined by finding automation opportunities in complex enterprise environments and building the tools to eliminate manual work at scale.

At Capgemini, I engineered PowerShell/PnP automation that reduced SharePoint migration processing by 87% (from 2 hours to 15 minutes), saving 10+ hours per month. I built a ServiceNow integration with M365 presence data and an algorithmic workload engine that eliminated manual ticket triage. I implemented CI/CD pipelines via Azure DevOps for SPFx solutions, reducing deployment cycles by 25%.

My technical skills include PowerShell, Python, Azure DevOps, Git, CI/CD, Infrastructure as Code, SharePoint Framework (SPFx), React, and TypeScript. I hold ITIL 4 Foundation and Certified Scrum Master certifications, and I am comfortable working across the full automation lifecycle.

I am immediately available and would love to discuss how I can contribute to Mastercard's engineering team.

Kind regards,

Sam Ludwig
