9 June 2026

Dear Hiring Manager at Service Stream,

I am writing to express my strong interest in the Senior Digital Support Engineer role. As an Infrastructure & M365 Engineer with 6+ years delivering technical support across Microsoft 365, Azure, and hybrid cloud environments, I bring the exact experience this position requires.

Currently at CapGemini, consulting to the Department of Education Victoria, I manage the largest SharePoint farm in the Southern Hemisphere (660,000+ users, 1,000+ sites, 99.9% uptime) and serve as the ultimate Tier-3 escalation point across M365 and Google Workspace, reducing repeat incidents by 15%. I engineered PnP PowerShell automation to audit and enforce MFA compliance across 200+ SharePoint sites and built a ServiceNow integration with M365 presence data that eliminated manual triage entirely.

My experience directly maps to your requirements:

- M365 Administration: Exchange Hybrid, Entra ID (Conditional Access, MFA), Intune (MDM/MAM), Autopilot, Teams, SharePoint Online, Defender, Purview
- Endpoint Management: Windows 11 migrations across 100+ clinical endpoints at St John of God Health Care with 100% Autopilot adherence
- Automation: PowerShell (advanced/PnP), Python, Azure DevOps CI/CD, reduced migration processing by 87% at Knosys
- ITSM: ServiceNow, ITIL 4, RCA documentation, incident/problem management
- Infrastructure: Layer 1 troubleshooting, VMware, Hyper-V, Windows Server, Active Directory

I also delivered L2/L3 support at Australia Post (via CapGemini), where I engineered keystroke injection automation to fully automate ITSM ticket workflows in ServiceNow.

I thrive in fast-paced environments where complex issues need seamless solutions. I am immediately available and confident I can deliver immediate value to your national team.

Kind regards,

Sam Ludwig
