Re: Customer Field Technician

Dear Hiring Team

I am pleased to apply for the Customer Field Technician role with nbn. I have direct experience delivering Layer 1 telecommunications work and a strong current foundation in customer-facing technical support and endpoint operations.

As a Telecommunications Field Technician with National Broadband Network, I executed physical infrastructure deployments, ran cabling through complex residential and commercial environments, fault-found physical network lines, and installed and maintained IT equipment. The work required precision, practical troubleshooting and clear interaction with customers and site stakeholders.

My recent Australia Post experience has strengthened those capabilities through L1/L2 face-to-endpoint and remote support, hardware diagnostics, OS recovery, new-user provisioning, endpoint imaging and lifecycle management. I own faults through escalation and resolution, maintain equipment records and support ServiceNow process improvements. At St John of God Health Care, I also translated complex technical issues into practical guidance for clinical users while deploying 100+ Windows 11 endpoints.

I would welcome the opportunity to return to nbn field operations and contribute dependable technical work, respectful customer service and a methodical approach to fault resolution.

Yours sincerely

Sam Ludwig
