Re: EUC Engineer

Dear Hiring Manager

APM's EUC Engineer opportunity matches my practical endpoint delivery experience and my broader Microsoft cloud background. I can contribute across deployment, troubleshooting, lifecycle management and the continuous improvement work that makes a digital workplace reliable.

I led a Windows 11 migration across more than 100 clinical endpoints at St John of God Health Care, managing Autopilot provisioning, Intune policy application, SOE adherence, compatibility testing and hypercare. At Australia Post, I supported a national endpoint environment across imaging, repair, provisioning, inventory, Autopilot/UEM enrolment and compliant disposal.

I also bring Tier-3 Microsoft 365 and identity experience from Capgemini, where I supported a 660,000+ user environment and automated recurring administration with PowerShell and Microsoft Graph. That combination lets me troubleshoot the device, understand the service behind it and document the lasting fix.

Yours sincerely

Sam Ludwig
