Re: Systems Administrator

Dear Hiring Manager

BAE Systems' Systems Administrator opportunity aligns with my experience supporting reliable enterprise infrastructure in environments where change control, documentation and operational discipline matter. I bring Microsoft cloud, Windows, endpoint and service-management depth, along with practical troubleshooting experience.

At Capgemini, I was a Tier-3 escalation point for a 660,000+ user government environment covering Microsoft 365, SharePoint, Exchange, Teams, OneDrive, Entra ID and hybrid identity. I managed critical changes and patching, maintained 99.9% uptime, and produced RCA reports and runbooks.

My recent Australia Post and St John of God Health Care roles strengthened my hands-on endpoint capability across imaging, Autopilot, Intune, Windows 11, hardware diagnostics and lifecycle control. I am comfortable following secure procedures, escalating accurately and taking ownership of the technical outcome.

Yours sincerely

Sam Ludwig
