Re: Senior Azure Cloud Engineer

Dear Hiring Manager

St Vincent's Health Australia's Senior Azure Cloud Engineer role aligns with my experience delivering cloud and Microsoft services in environments where reliability and security are essential. I bring hands-on Azure, identity, automation and operational support depth.

At Capgemini, I supported the Department of Education Victoria as a Tier-3 escalation point across Microsoft 365, Entra ID, hybrid identity and collaboration services. I supported Azure cloud initiatives aligned with Essential 8 requirements, while managing a 660,000+ user SharePoint environment with 99.9% uptime.

My recent healthcare endpoint migration work at St John of God Health Care gives me direct appreciation for clinical continuity. I approach cloud engineering with the same discipline: understand the operational impact, secure the service, automate repeatable work and document the result clearly.

Yours sincerely

Sam Ludwig
