Subject

Application - Data Center Operations Technician Trainee - Sam Ludwig

Email body

Hello Hiring Manager

I'm writing about the Data Center Operations Technician Trainee position with Amazon Web Services. The explicit trainee structure is attractive because it combines server and networking exposure with a defined path to build data-centre operations capability. The listing appears older, so I'd confirm that the position is still available first.

My background includes enterprise technical support, endpoint lifecycle management, field infrastructure, systematic fault-finding, customer communication and process-focused documentation.

The areas most relevant to the role are layer 1 networking, data-centre operations, customer support.

I'd welcome a brief conversation about the role and any position-specific requirements.

Regards

Sam Ludwig
