Subject

Application - Infrastructure Delivery - Network Technician - Sam Ludwig

Email body

Hello Hiring Manager

I'm writing about the Infrastructure Delivery - Network Technician position with AWS. My NBN field-technician background and enterprise infrastructure experience provide a strong base for network technician work in data-centre delivery.

My background includes enterprise technical support, endpoint lifecycle management, field infrastructure, systematic fault-finding, customer communication and process-focused documentation.

The areas most relevant to the role are layer 1 networking, data-centre operations.

I'd welcome a brief conversation about the role and any position-specific requirements.

Regards

Sam Ludwig
