Hello Hiring Manager

I'm writing about the Maintenance / Groundskeeper position with Victorian Government. My field service, HVAC maintenance and site-assessment experience provides transferable grounds and facilities support skills. I don't hold horticultural qualifications, so I'd want to confirm the role's exact requirements.

My background includes enterprise technical support, endpoint lifecycle management, field infrastructure, systematic fault-finding, customer communication and process-focused documentation.

The areas most relevant to the role are hvac, data-centre operations, customer support.

I'd welcome a brief conversation about the role and any position-specific requirements.

Regards

Sam Ludwig
