Re: Senior Project Engineer (VIC/SA) - Comwire IT

Dear Hiring Manager

I am applying for the Senior Project Engineer (VIC/SA) position with Comwire IT. This Prahran-based project engineering role is a strong match for my experience taking technical work from scoping and solution planning through implementation, support, and durable handover.

At Australia Post via Capgemini, I delivered hardware diagnostics, Windows imaging, endpoint provisioning, Autopilot/UEM enrolment, inventory control, loan-device management, compliant disposal, and ServiceNow automation. At St John of God Health Care, I led Windows 11 migration across more than 100 clinical endpoints using Autopilot and Intune, including application validation and hypercare.

Earlier work at NBN Co developed practical site assessment, physical infrastructure installation, equipment handling, systematic fault-finding, and customer communication. My Capgemini experience adds Tier-3 Microsoft 365, Entra ID, Azure, SharePoint, Exchange, PowerShell automation, incident management, RCA, and durable documentation.

The role areas most relevant to my background are Azure, Microsoft 365, PowerShell, project delivery. I would bring dependable ownership, clear communication, and a willingness to learn the way your team works.

I am happy to confirm any licence, qualification, clearance, vehicle, insurance, roster, subcontractor, or prior-industry requirements before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
