Re: Systems Engineer - NCS

Dear Hiring Manager

I am applying for the Systems Engineer position with NCS. Fresh individual contract role with NCS supporting government and enterprise environments. Good fit for Microsoft infrastructure, service operations, escalation handling, migration work, and customer-facing delivery.

My recent work at Australia Post via Capgemini covered endpoint support, Windows imaging, provisioning, Autopilot/UEM enrolment, hardware lifecycle, inventory, user access, and ServiceNow automation. At St John of God Health Care, I led a Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, application validation, and post-deployment support.

Earlier work with Capgemini for the Department of Education Victoria involved Microsoft 365, Azure, Entra ID, hybrid identity, security-aware change, Tier 3 escalation, PowerShell automation, RCA, and operational documentation at significant scale.

The areas most relevant to this role are systems engineering, cloud services, windows, service operations, government and enterprise. I would bring dependable task ownership, clear communication, practical troubleshooting, and a willingness to learn the way your team works.

I am happy to confirm any licence, qualification, clearance, roster, travel, or role-specific requirement before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
