Re: Project Manager, Infrastructure Services - Victorian Department of Health

Dear Hiring Manager

I am applying for the Project Manager, Infrastructure Services position with Victorian Department of Health. Direct Victorian Government listing in the Infrastructure & M365 Services Unit. The role leads infrastructure and platform initiatives from approval through implementation and transition to business-as-usual support, with strong overlap across Sam's government delivery, Microsoft 365, cloud, SLA, vendor, risk, and operational-readiness experience.

My recent work at Australia Post via Capgemini covered endpoint support, Windows imaging, provisioning, Autopilot and UEM enrolment, hardware lifecycle, inventory, user access, and ServiceNow automation. At St John of God Health Care, I led a Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, application validation, and post-deployment support.

Earlier work with Capgemini for the Department of Education Victoria involved Microsoft 365, Azure, Entra ID, hybrid identity, security-aware change, Tier 3 escalation, PowerShell automation, root-cause analysis, service levels, and operational documentation at significant scale.

The experience most relevant to this position includes infrastructure projects, Microsoft 365, cloud infrastructure, service transition, SLA management, vendor management, risk and issue management. I bring dependable ownership, clear stakeholder communication, practical troubleshooting, and a disciplined approach to service transition and continuous improvement.

I am happy to confirm any qualification, clearance, travel, office-attendance, contract, or role-specific requirement before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
