Re: Cloud Operations Administrator - Leidos Australia

Dear Hiring Manager

I am applying for the Cloud Operations Administrator position with Leidos Australia. Leidos Australia is seeking a Cloud Operations Administrator to support cloud operations for a world-leading technology business, offering up to 12 extra days of leave per year through their Life Days program. Strong fit with Sam's Microsoft 365, Azure, automation, and incident-management background.

My recent work at Australia Post via Capgemini covered endpoint support, Windows imaging, provisioning, Autopilot and UEM enrolment, hardware lifecycle, inventory, user access, and ServiceNow automation. At St John of God Health Care, I led a Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, application validation, and post-deployment support.

Earlier work with Capgemini for the Department of Education Victoria involved Microsoft 365, Azure, Entra ID, hybrid identity, security-aware change, Tier 3 escalation, PowerShell automation, root-cause analysis, service levels, and operational documentation at significant scale.

The experience most relevant to this position includes cloud operations, Microsoft 365, Azure, incident management, automation, enterprise infrastructure. I bring dependable ownership, clear stakeholder communication, practical troubleshooting, and a disciplined approach to service transition and continuous improvement.

I am happy to confirm any qualification, clearance, travel, office-attendance, contract, or role-specific requirement before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
