Re: National Stores Senior IT Engineer - Metcash

Dear Hiring Manager

I am applying for the National Stores Senior IT Engineer position with Metcash. Metcash is recruiting a National Stores Senior IT Engineer to support stores nationally, transitioning from Port Melbourne to Heatherton in late 2026. This is an outstanding endpoint, Windows, Intune, and enterprise-support match for Sam's L2/L3 endpoint and migration delivery experience.

My recent work at Australia Post via Capgemini covered endpoint support, Windows imaging, provisioning, Autopilot and UEM enrolment, hardware lifecycle, inventory, user access, and ServiceNow automation. At St John of God Health Care, I led a Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, application validation, and post-deployment support.

Earlier work with Capgemini for the Department of Education Victoria involved Microsoft 365, Azure, Entra ID, hybrid identity, security-aware change, Tier 3 escalation, PowerShell automation, root-cause analysis, service levels, and operational documentation at significant scale.

The experience most relevant to this position includes end-user computing, Intune, Autopilot, windows, enterprise support, retail technology, asset lifecycle. I bring dependable ownership, clear stakeholder communication, practical troubleshooting, and a disciplined approach to service transition and continuous improvement.

I am happy to confirm any qualification, clearance, travel, office-attendance, contract, or role-specific requirement before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
