Re: System Engineer - Service Stream

Dear Hiring Manager

I am applying for the System Engineer position with Service Stream. Service Stream is seeking a hands-on Systems Engineer to maintain and improve infrastructure, cloud platforms, and the Microsoft 365 environment across a national telecommunications and infrastructure business. Strong alignment with Sam's enterprise Microsoft 365, Azure, Windows, and automation experience.

My recent work at Australia Post via Capgemini covered endpoint support, Windows imaging, provisioning, Autopilot and UEM enrolment, hardware lifecycle, inventory, user access, and ServiceNow automation. At St John of God Health Care, I led a Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, application validation, and post-deployment support.

Earlier work with Capgemini for the Department of Education Victoria involved Microsoft 365, Azure, Entra ID, hybrid identity, security-aware change, Tier 3 escalation, PowerShell automation, root-cause analysis, service levels, and operational documentation at significant scale.

The experience most relevant to this position includes Microsoft 365, cloud platforms, infrastructure, windows server, PowerShell, enterprise support, service delivery. I bring dependable ownership, clear stakeholder communication, practical troubleshooting, and a disciplined approach to service transition and continuous improvement.

I am happy to confirm any qualification, clearance, travel, office-attendance, contract, or role-specific requirement before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
