PROFESSIONAL SUMMARY

Healthcare-focused IT support and training specialist with hands-on experience deploying and troubleshooting clinical technology in live hospital environments, including endpoint upgrades on wards and direct liaison with medical staff during rollout. Skilled in coordinating onboarding and end-user training across classroom, 1:1 and remote settings, with a strong background in IT service management (ServiceNow), SLA-based incident resolution, and operational reporting — with a broader technical systems background (SharePoint, Microsoft 365, Azure) suited to complex, multi-stakeholder environments such as shared EMR platforms.

PROFESSIONAL EXPERIENCE

Application Support Consultant (Contracted to Dept of Education)

December 2021 – May 2026

Capgemini, Melbourne

- Provided technical support and maintenance for enterprise-scale SharePoint solutions, ensuring system stability and high user satisfaction.
- Coordinated onboarding requirements and assisted with workflow improvements, ensuring users were trained on system functionalities.
- Utilised ServiceNow to log, track and resolve user access requests and escalated incidents within strict SLAs.
- Prepared reports and monitored system health metrics to support operational compliance and visibility — directly comparable to the reporting and metrics work required for EMR operations.

Technical Deployment Project Specialist

Completed December 2025

St John of God Health Care

- Acted as onsite technical resource for a hospital-wide Windows 11 upgrade project, deploying new endpoints and upgrading existing devices across clinical wards.
- Configured and supported specialised clinical hardware including Workstations on Wheels (WOWs) and ward printers, ensuring minimal disruption to patient care areas.
- Liaised directly with medical staff to schedule upgrades, troubleshoot issues on the spot, and confirm devices were fit for clinical use before handover.

Temporary IT Support Specialist

Completed May 2026

Australia Post myIT Hub, Richmond

- Delivered 1:1 on-site technical assistance, end-user support and onboarding services in a fast-paced environment.
- Assisted staff with software access troubleshooting, hardware queries and user education.

Application Support Engineer

December 2020 – December 2021

Knosys, Melbourne

- Provided Tier 2 & 3 support for web-based knowledge management applications, resolving 95% of issues within targeted SLA timeframes.
- Developed and deployed automation tools that reduced manual update efforts and data entry by 20%.

SharePoint Developer & Support

March 2018 – December 2020

Engage Squared, Melbourne

- Provided technical support and training to clients across high-profile organisations, ensuring seamless adoption of new solutions.
- Led client workshops and classroom-style sessions to demonstrate system best practices, troubleshoot issues and support end users.
- Managed deployment automation and maintained accurate documentation using Azure DevOps and Git.

Telecommunications Technician

October 2016 – November 2017

National Broadband Network, Melbourne

- Installed, maintained and removed telecommunications infrastructure with precision.

EDUCATION

Web Development, Fast Track Bootcamp Graduate

July 2017 – February 2018

Coder Academy, Melbourne
