Re: End User Computing Support Engineer

Dear Hiring Manager

The Bureau of Meteorology role is a strong match for my endpoint engineering and enterprise support background. I bring practical Windows fleet experience, Intune and Autopilot delivery, ServiceNow operations, and the calm troubleshooting discipline required when staff depend on technology across multiple offices.

At Australia Post, I delivered hardware diagnostics, Windows imaging, provisioning, Autopilot/UEM enrolment, inventory control, loan-device management and compliant disposal in a national enterprise environment. At St John of God Health Care, I led Windows 11 migration across more than 100 clinical endpoints, validating applications and providing hypercare without disrupting patient-facing operations.

My broader Capgemini experience adds Tier-3 escalation depth across Microsoft 365, Entra ID, SharePoint, Exchange and hybrid identity, together with PowerShell automation, RCA reporting and knowledge management. I can contribute immediately to reliable EUC support while improving repeatability and documentation.

Yours sincerely

Sam Ludwig
