Re: End User Services Engineer

Dear Hiring Manager

Canon Business Services' End User Services Engineer role is a strong fit for my combination of modern Microsoft technology and customer-facing support. I bring hands-on Intune and Windows 11 delivery, along with the enterprise service discipline needed to support strategic customers.

At Australia Post, I delivered endpoint support across hardware diagnostics, imaging, provisioning, Autopilot/UEM enrolment, inventory and compliant disposal. At St John of God Health Care, I led Windows 11 migration across more than 100 clinical endpoints and provided application validation, user handoff and hypercare.

Earlier, at Capgemini, I operated as a Tier-3 escalation point across Microsoft 365, Entra ID, SharePoint, Exchange and Teams in a 660,000+ user environment. I would bring Canon a technically credible engineer who communicates clearly, protects customer confidence and improves recurring service problems.

Yours sincerely

Sam Ludwig
