Subject

Application - Engineering Operations Technician - Sam Ludwig

Email body

Hello Hiring Manager

I'm writing about the Engineering Operations Technician position with Amazon.com. The data-centre engineering-operations role is a credible practical infrastructure pathway. My endpoint, telecommunications and HVAC backgrounds provide relevant equipment, fault-finding and operational-procedure experience; clearance requirements must be confirmed.

My background includes enterprise technical support, endpoint lifecycle management, field infrastructure, systematic fault-finding, customer communication and process-focused documentation.

The areas most relevant to the role are Intune, hvac, data-centre operations.

I'd welcome a brief conversation about the role and any position-specific requirements.

Regards

Sam Ludwig
