Subject

Application - Senior DevOps Engineer - Sam Ludwig

Email body

Hello Hiring Manager

I'm writing about the Senior DevOps Engineer position with FMClarity. Fresh Melbourne SaaS infrastructure role in a facilities and maintenance platform. A stretch toward DevOps, but aligned with cloud operations, automation, troubleshooting and service improvement.

My background includes enterprise technical support, endpoint lifecycle management, field infrastructure, systematic fault-finding, customer communication and process-focused documentation.

The areas most relevant to the role are PowerShell, data-centre operations, customer support.

I'd welcome a brief conversation about the role and any position-specific requirements.

Regards

Sam Ludwig
