Re: L1 Helpdesk Technician (VIC) - Comwire IT

Dear Hiring Manager

I'm applying for the L1 Helpdesk Technician (VIC) position with Comwire IT. This role matches my practical experience supporting end users by phone, remote tools, and face-to-face engagement while resolving hardware, software, access, and connectivity issues within SLA.

My recent experience combines hands-on service delivery with enterprise engineering. At Australia Post via Capgemini, I delivered endpoint and infrastructure support, managed hardware and software lifecycle work, resolved complex faults, and built ServiceNow automation that removed repetitive manual effort. At St John of God Health Care, I delivered a Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, application validation, and post-deployment support.

Earlier work with Capgemini for the Department of Education Victoria involved Azure, Microsoft 365, Entra ID, hybrid identity, security-aware change, Tier-3 escalation, PowerShell automation, and documented operational improvement at significant scale. My field and application-support background adds practical fault-finding, customer communication, disciplined triage, and durable root-cause analysis.

The areas most relevant to the role are L1 helpdesk, technical assistance, hardware. I'd bring dependable task ownership, clear communication, and a willingness to learn the way your team works.

I'm happy to confirm any licence, qualification, check, roster, or role-specific requirement before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
