Re: Café Supervisor - Max Brenner

Dear Hiring Manager

I'm applying for the Café Supervisor position with Max Brenner. This is a practical part-time pathway. My direct experience is in customer-facing technical operations rather than hospitality, but I bring fast-paced service delivery, stock handling, clear communication, shift discipline, and a willingness to complete any required food-safety training.

My recent experience combines hands-on service delivery with enterprise engineering. At Australia Post via Capgemini, I delivered endpoint and infrastructure support, managed hardware and software lifecycle work, resolved complex faults, and built ServiceNow automation that removed repetitive manual effort. At St John of God Health Care, I delivered a Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, application validation, and post-deployment support.

Earlier work with Capgemini for the Department of Education Victoria involved Azure, Microsoft 365, Entra ID, hybrid identity, security-aware change, Tier-3 escalation, PowerShell automation, and documented operational improvement at significant scale. My field and application-support background adds practical fault-finding, customer communication, disciplined triage, and durable root-cause analysis.

The areas most relevant to the role are café supervisor, part-time, customer service. I'd bring dependable task ownership, clear communication, and a willingness to learn the way your team works.

I'm happy to confirm any licence, qualification, check, roster, or role-specific requirement before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
