Subject

Application - Critical Operations Technician - Electrical (Australia) - Sam Ludwig

Email body

Hello Hiring Manager

I'm writing about the Critical Operations Technician - Electrical (Australia) position with STACK Infrastructure APAC. This role is a practical adjacent match: I bring physical infrastructure, facilities-awareness, hardware troubleshooting, data-centre thermal-management understanding, structured cabling, and disciplined service operations. Electrical credentials must be confirmed before applying.

My background includes enterprise technical support, infrastructure and endpoint delivery, systematic fault-finding, customer communication, process-focused documentation, and automation.

The areas most relevant to the role are critical operations, data centers, electrical.

I'd welcome a brief conversation about the role and any position-specific requirements.

Regards

Sam Ludwig
