Re: System Support Specialist (Windows, SQL) - Intelrad

Dear Hiring Manager

I am applying for the System Support Specialist (Windows, SQL) position with Intelrad. Fresh remote Australia listing supporting healthcare imaging technology. Credible fit through Windows Server, SQL, application support, healthcare migration context, and remote operations.

At Australia Post via Capgemini, I delivered endpoint and infrastructure support, managed hardware and software lifecycle work, resolved complex faults, and built ServiceNow automation that reduced repetitive manual effort. At St John of God Health Care, I delivered a Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, application validation, and post-deployment support.

Earlier work with Capgemini for the Department of Education Victoria involved Azure, Microsoft 365, Entra ID, hybrid identity, security-aware change, Tier 3 escalation, PowerShell automation, and documented operational improvement at significant scale.

The areas most relevant to this role are windows, sql, remote support, healthcare technology. I would bring dependable task ownership, clear communication, practical troubleshooting, and a willingness to learn the way your team works.

I am happy to confirm any licence, qualification, clearance, roster, travel, or role-specific requirement before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
