Re: Cyber Security & IT Systems Analyst - IAE Engineering

Dear Hiring Manager

I am applying for the Cyber Security & IT Systems Analyst position with IAE Engineering. IAE Engineering is seeking a Cyber Security & IT Systems Analyst responsible for maintaining and improving internal IT systems and cyber security, supporting a Microsoft 365 and cloud environment. Good match for Sam's M365, security-baseline, identity, and automation experience.

My recent work at Australia Post via Capgemini covered endpoint support, Windows imaging, provisioning, Autopilot and UEM enrolment, hardware lifecycle, inventory, user access, and ServiceNow automation. At St John of God Health Care, I led a Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, application validation, and post-deployment support.

Earlier work with Capgemini for the Department of Education Victoria involved Microsoft 365, Azure, Entra ID, hybrid identity, security-aware change, Tier 3 escalation, PowerShell automation, root-cause analysis, service levels, and operational documentation at significant scale.

The experience most relevant to this position includes Microsoft 365, security controls, cloud platforms, business systems, PowerShell, incident response. I bring dependable ownership, clear stakeholder communication, practical troubleshooting, and a disciplined approach to service transition and continuous improvement.

I am happy to confirm any qualification, clearance, travel, office-attendance, contract, or role-specific requirement before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
