Re: IT Engineer - Cloud & Entra ID - Yarra Trams

Dear Hiring Manager

I am applying for the IT Engineer - Cloud & Entra ID position with Yarra Trams. Direct employer listing from Yarra Trams for an IT Engineer owning cloud and Entra ID environments within Melbourne's largest tram network. The role covers Microsoft Entra ID, Microsoft 365, cloud identity, conditional access, and automation, which maps almost one-to-one onto Sam's enterprise Microsoft, Azure, and identity-administration background at scale.

My recent work at Australia Post via Capgemini covered endpoint support, Windows imaging, provisioning, Autopilot and UEM enrolment, hardware lifecycle, inventory, user access, and ServiceNow automation. At St John of God Health Care, I led a Windows 11 migration across more than 100 clinical endpoints using Autopilot, Intune, application validation, and post-deployment support.

Earlier work with Capgemini for the Department of Education Victoria involved Microsoft 365, Azure, Entra ID, hybrid identity, security-aware change, Tier 3 escalation, PowerShell automation, root-cause analysis, service levels, and operational documentation at significant scale.

The experience most relevant to this position includes microsoft Entra ID, Microsoft 365, cloud infrastructure, identity and access management, Azure, automation, tier 2/3 support. I bring dependable ownership, clear stakeholder communication, practical troubleshooting, and a disciplined approach to service transition and continuous improvement.

I am happy to confirm any qualification, clearance, travel, office-attendance, contract, or role-specific requirement before progressing.

Thank you for considering my application. I would welcome a conversation about how my background could contribute to your team.

Yours sincerely

Sam Ludwig
