Re: Senior Microsoft 365 Platform Engineer - National Australia Bank

Dear Hiring Manager

I am writing to express my strong interest in the Senior Microsoft 365 Platform Engineer position at National Australia Bank. With 7+ years of experience in Microsoft 365 engineering and enterprise infrastructure, I bring deep technical expertise across SharePoint, Exchange, Teams, and Entra ID at scale.

At the Department of Education Victoria (via Capgemini), I managed the largest SharePoint farm in the Southern Hemisphere - 660,000+ active users across 1,000+ site collections - consistently achieving 99.9% uptime in a government SLA environment. I served as the ultimate Tier-3 escalation point across SharePoint Online, Exchange Hybrid, Teams, and Google Workspace, and engineered a PnP PowerShell solution to audit and enforce MFA compliance across 200+ sensitive sites. At St John of God Health Care, I led Windows 11 migration across 100+ clinical endpoints using Autopilot and Intune in live hospital environments with zero tolerance for patient care disruption. I managed the full lifecycle - hardware preparation, enrolment, policy application, clinical software compatibility testing, and intensive hypercare support.

I hold Microsoft Certified: Azure Administrator Associate (AZ-104), ITIL 4 Foundation, and Certified Scrum Master certifications. I am immediately available and would welcome the opportunity to discuss how my experience aligns with National Australia Bank's needs.

Yours sincerely

Sam Ludwig
